Data Analytics

Boitumelo Khumalo

1. Assignment objective

What the analysis is intended to answer

SALES PERFORMANCE

How much revenue is generated, and how does it change over time?

PRODUCT PERFORMANCE

Which products or categories contribute most to sales?

BUSINESS INSIGHT

What patterns can help improve sales and decision-making?

Objective: turn sales data into clear, practical findings.

2. Dataset overview

The dataset is the starting point for the sales analysis

SALES RECORDS

Transaction-level information used to measure sales performance.

PRODUCT DETAILS

Product names or categories used to compare item performance.

DATE / TIME FIELDS

Date and time fields help identify trends and busy periods.

3. Data preparation

Quality checks help make the findings reliable

01 **Check missing values** — Identify blank or incomplete fields.

02 **Check duplicates** — Confirm records are not counted twice.

03 **Check data types** — Ensure dates, quantities and sales values are correctly formatted.

04 **Validate calculations** — Check totals and averages against the source data.

4. Key performance indicators

Measures to summarise overall performance

TOTAL SALES

$698,812

TRANSACTIONS

149,116

UNITS SOLD

214,470

AVERAGE SALE

$4.69

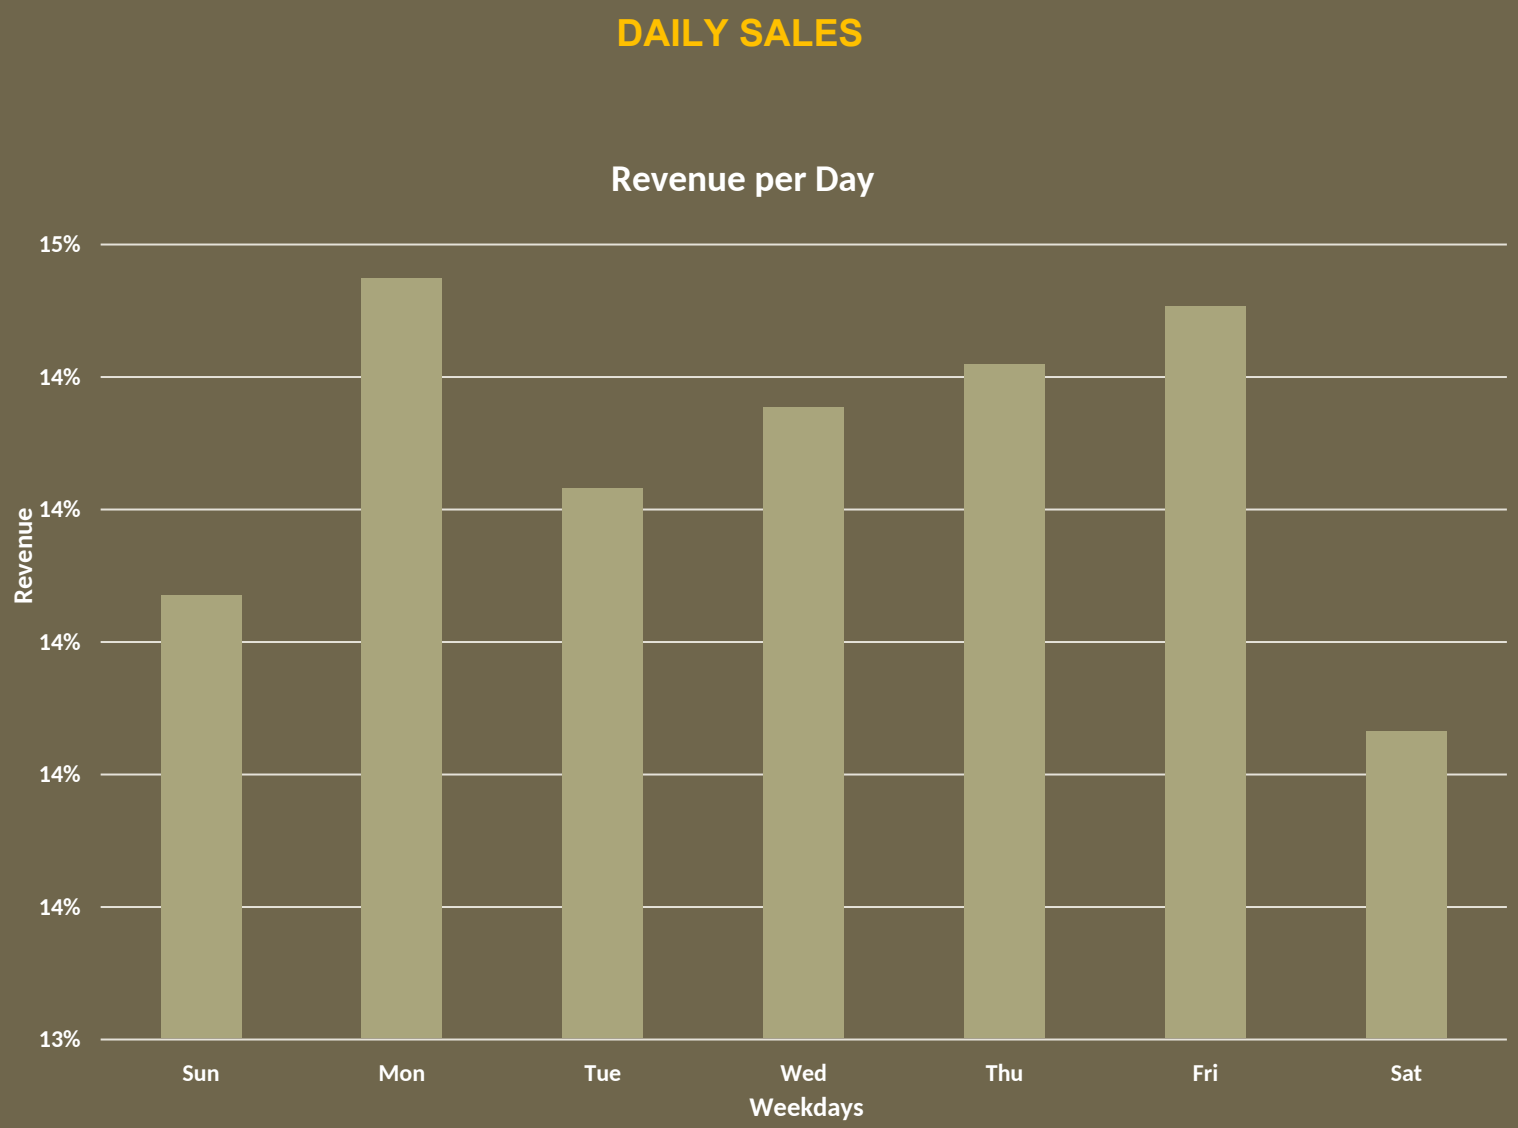

TOP PRODUCT

Best-Selling Product
Earl Grey Rg
(4,708 units)

SALES TREND

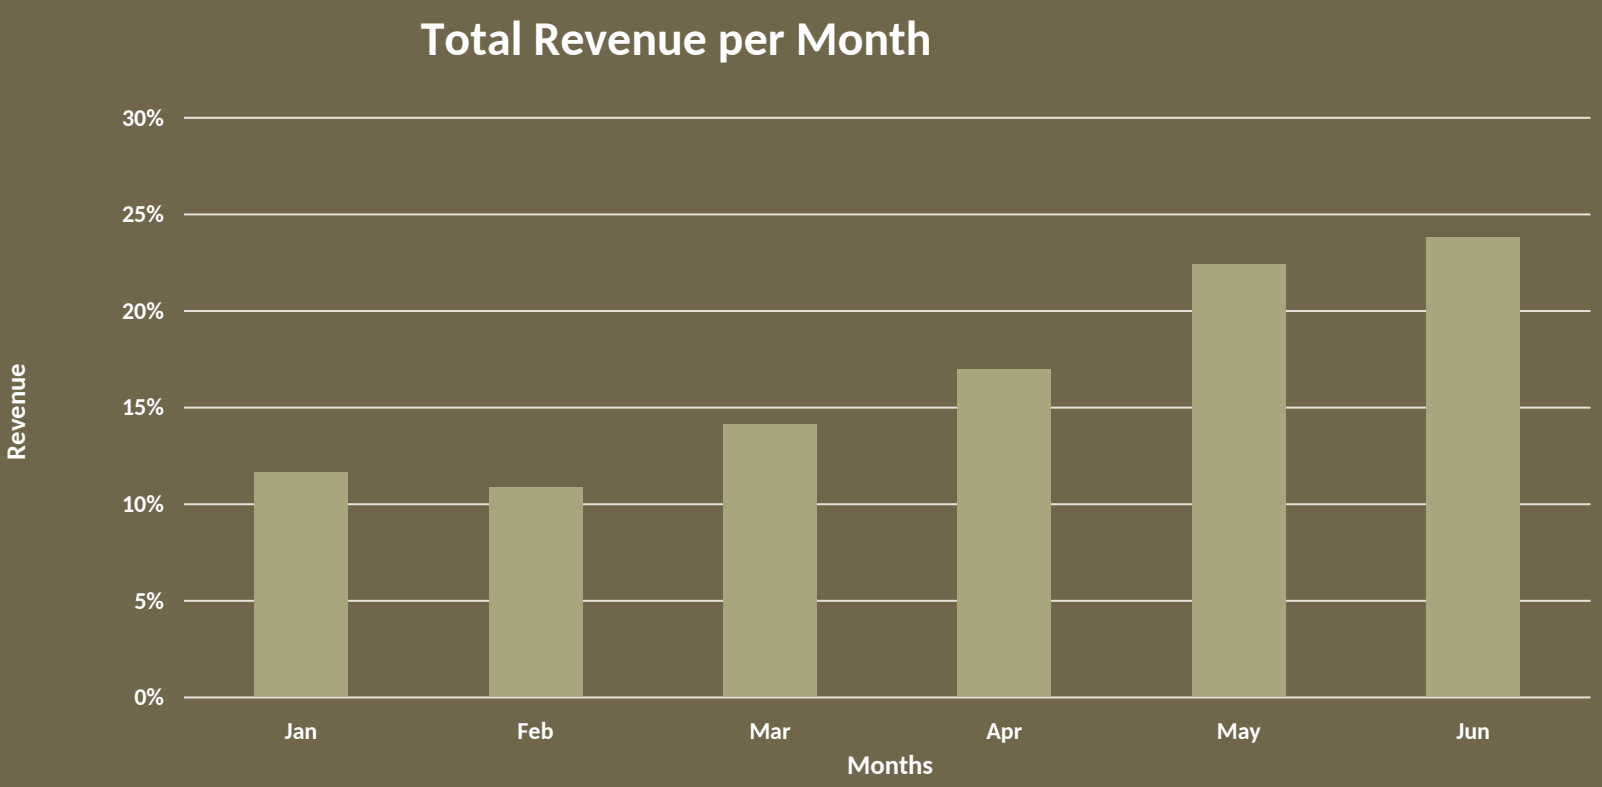

Weekday / Weekend
72.1% / 27.9%
Share of revenue

5. Sales over time

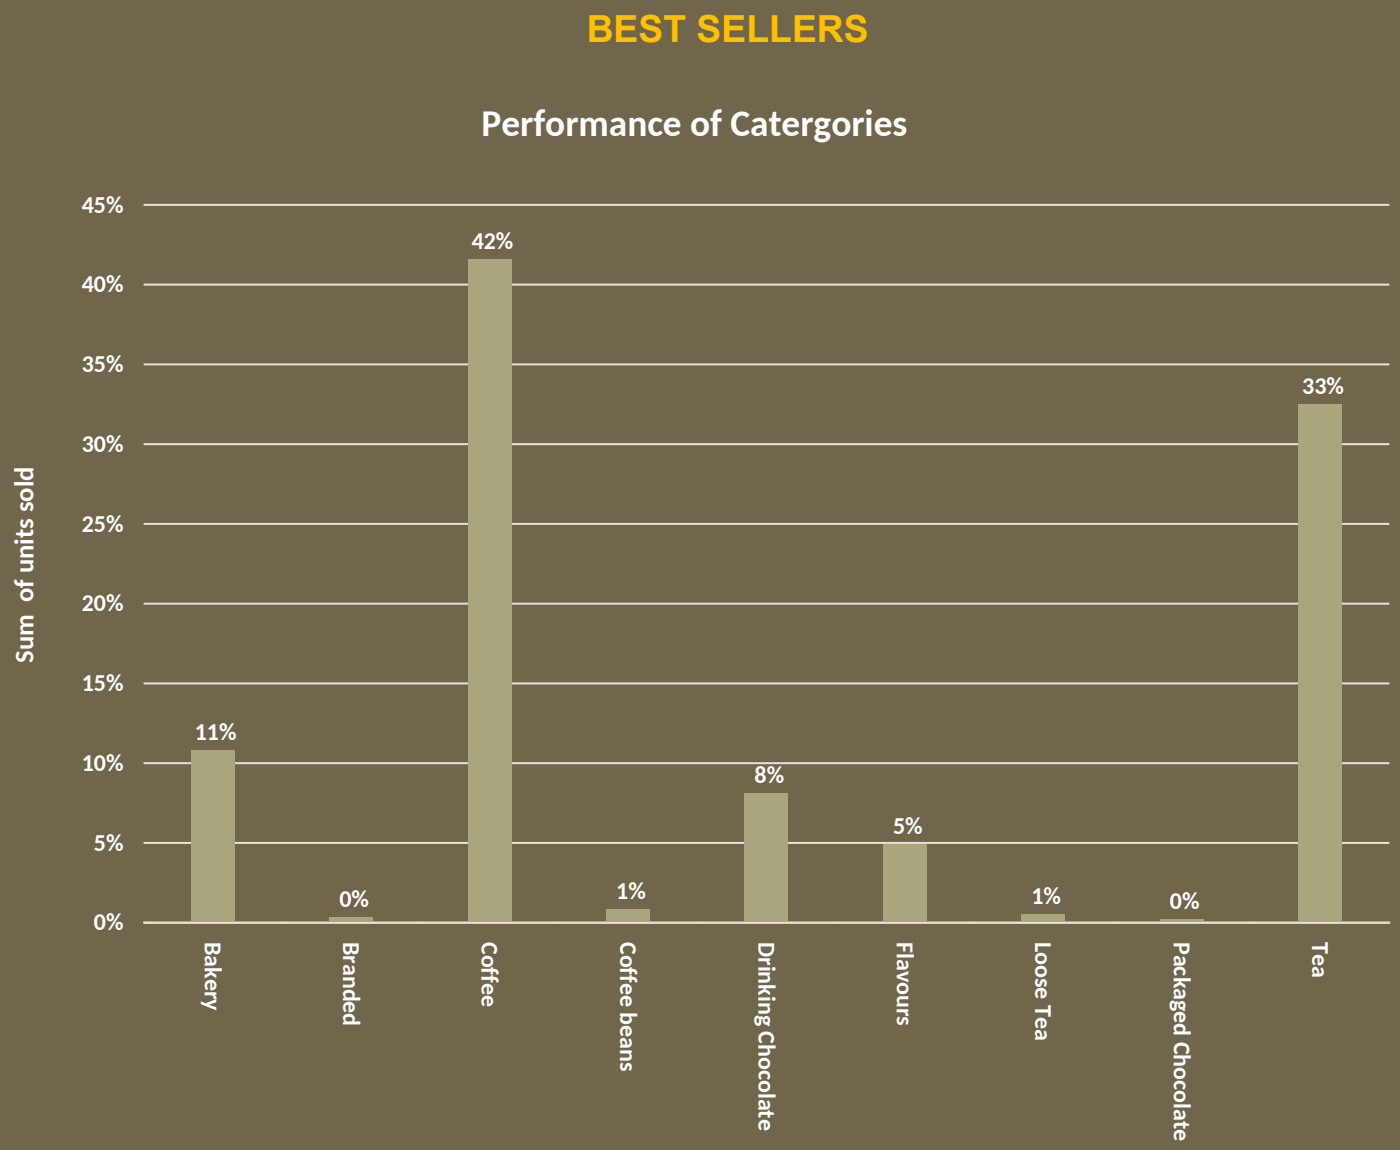

- **Monday is the busiest day in the week, followed by Friday**

MONTHLY SALES

- June was the best performing month, followed by May.
- The gradual increase in sales for those months could be due to seasonal change

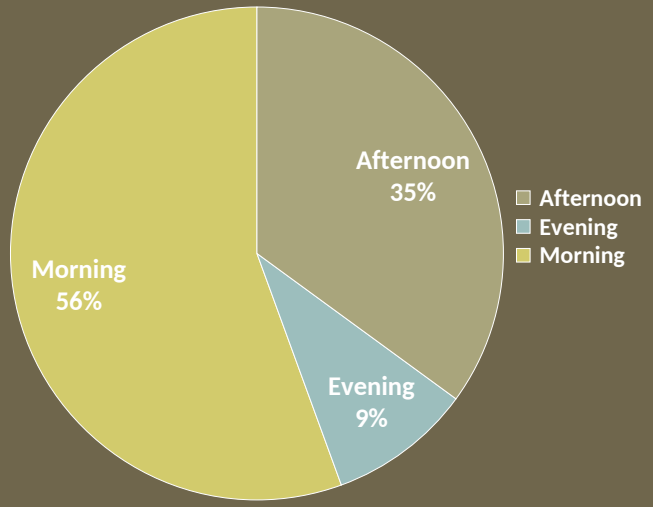

6. Product performance

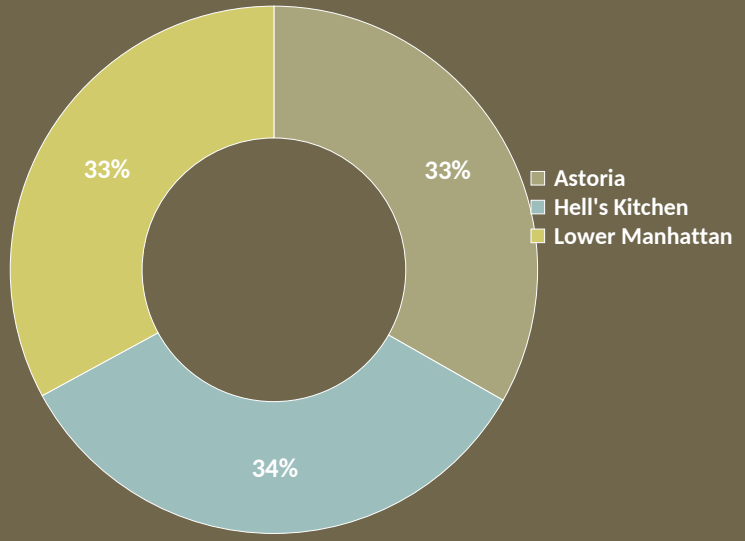

- Coffee and tea are the best sellers across the 3 locations
- While Packaged chocolates, branded, coffee beans and loose tea are some of the weaker performers.

7. Trading patterns

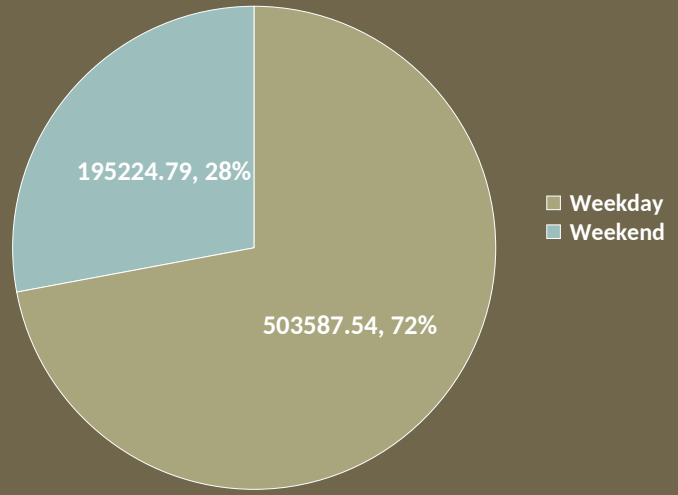

Total Revenue by Time of Day

Revenue by Store Location

Weekday vs Weekend

PEAK PERIODS

Mornings bring in the most traffic and sales, followed by afternoons.

LOCATION

The performance of the different store locations is relatively the the same, with the top performer being Hell's Kitchen by 1% more then the other.

WEEKLY TREND

Weekdays bring in more revenue by 72% as compared to the weekend that only brings in 28%

8. Store Locations

9. Recommendations

- Identify the hours and days with the lowest sales, then introduce targeted promotions to attract customers during those periods.
- Offer discounted coffee and pastry combinations.
- Compare customer visits and revenue during promotional periods against the same periods before the campaign.
- Priorities stock replenishment for high-demand products.
- Set minimum stock levels to prevent popular items from running out.
- Use daily sales patterns to estimate demand and reduce unnecessary purchases
